

GILKES HYDRO SITE OPEN DAY

LOCHY HYDRO PROJECT, INVERLOCHY, SCOTLAND

Thursday 15th June 2017

Our 2017 Open Day will be held at the 2MW Lochy Hydro Scheme located at Inverlochy, near Dalmally, Argyll, Scotland. The project is a classic medium-head, high flow design incorporating a large single intake, large bore pipeline and twin Gilkes Francis turbines in a purpose built powerhouse. The scheme is also adjacent to the Eas a Ghail Powerhouse which is a 1.5MW scheme utilising a twin jet pelton turbine and will also be open for viewing on the day.

This is a unique opportunity for future site owners, developers and anyone with a keen interest in hydro to see all aspects of a working hydro installation.

Guided tours will take place throughout the day and Refreshments will be available

This is a free to attend event but places are limited; so if you would like to be part of this opportunity, please register your interest on line at www.gilkes.com/event-signup
